Dear Colleagues

NICE Clinical Guideline NG131 - Prostate cancer: diagnosis and management (updates and replaces CG175) - <https://www.nice.org.uk/guidance/ng131>

The Department has recently reviewed the above NICE guidance and has formally endorsed it as applicable in Northern Ireland.

In accordance with the process outlined in circular HSC (SQSD) 3/13, the following actions should be taken (<https://www.health-ni.gov.uk/sites/default/files/publications/dhssps/hsc-sqsd-3-13.pdf>)

1. HSC Board / PHA
 - a. Identify a Professional Lead who will consider the commissioning implications of the Clinical Guideline and co-ordinate with any other relevant commissioning teams. This Lead will identify any areas where regional planning / investment / commissioning are required, or where there is material risk to safety or quality. These will then be actioned immediately through normal commissioning arrangements or through bespoke arrangements reflecting the nature of the issue / risk.
 - b. Ensure that relevant guidance is sent to the appropriate Family Practitioners.
 - c. Seek positive assurance from the HSC Trusts that the required initial actions have been undertaken within a 3 month period, and that the Guideline has been implemented within a further 9 months (unless otherwise notified by the HSC Trusts).
 - d. Where significant investment/ commissioning needs cannot be met within the usual timeframe, agree appropriate arrangements with HSC Trusts. Report to DoH as required at 6 monthly accountability meetings.
2. HSC Trusts
 - a. Proceed with targeted dissemination, agree a clinical/management lead to coordinate implementation and consider what has to be done to achieve implementation using a risk based assessment and baseline review as appropriate to support planning. These initial actions should be undertaken within a three month period.
 - b. Implement the Guideline within a further 9 months (apart from any elements where significant issues have been raised with the HSC Board/PHA).
 - c. Provide positive assurances to the HSC Board that required initial actions have been taken within the 3 month planning period and that the Guideline has been implemented within a further 9 months, where appropriate.
 - d. Where significant investment/ commissioning needs cannot be met within the usual timeframe, notify the HSC Board/PHA at the earliest opportunity through the bi-monthly director level meetings and agree appropriate arrangements with them to achieve implementation.
3. RQIA
 - a. Disseminate the Guideline to the independent sector as appropriate.
4. HSC Special Agencies and NDPBs
 - a. Take account of this Guideline in training and other developments as appropriate.

To inform the planning process, please find attached details from the Departmental review. You should consider and take account of other relevant Departmental policies and strategies in your planning, as well as any legislative / policy caveats identified in the course of the Departmental review.

A full current list of NICE guidance endorsed for application in Northern Ireland can be found on the Department's website at <https://www.health-ni.gov.uk/topics/safety-and-quality-standards/national-institute-health-and-care-excellence-nice>

A handwritten signature in black ink, appearing to read 'Paddy Woods', written in a cursive style.

Dr Paddy Woods
Deputy Chief Medical Officer

Appendix 1

Endorsed NICE guidance - Details from Departmental review

Reference Number	NICE Clinical Guideline – NG131 https://www.nice.org.uk/guidance/ng131
Title	Prostate cancer: diagnosis and management
Summary of guidance	<p>This guideline updates and replaces NICE Clinical Guideline CG175 - Prostate cancer: diagnosis and treatment (endorsed by DoH in January 2014).</p> <p>The guideline covers the diagnosis and management of prostate cancer in secondary care, including information on the best way to diagnose and identify different stages of the disease, and how to manage adverse effects of treatment. It also includes recommendations on follow-up in primary care for people diagnosed with prostate cancer.</p> <p>It includes new and updated recommendations on:</p> <ul style="list-style-type: none"> • MRI and biopsy • localised and locally advanced prostate cancer • follow-up for localised or locally advanced prostate cancer • treatment for metastatic prostate cancer • bone-targeted therapies <p>It also includes recommendations on:</p> <ul style="list-style-type: none"> • information and support • hormone therapy
Related strategically relevant DoH/ HSC policies	None
Inter-Departmental interest	None
Legislative / policy caveats	This advice does not override or replace the individual responsibility of health professionals to make appropriate decisions in the circumstances of their individual patients, in consultation with the patient and/or guardian or carer. This would, for example, include situations where individual patients have other conditions or complications that need to be taken into account in determining whether the NICE guidance is fully appropriate in their case.

Where this guidance indicates that informed consent should be obtained and documented, the DoH guidance *Reference Guide to Consent for Examination, Treatment or Care (2003)*, gives advice on the law concerning consent to intervention.

Available at: <https://www.health-ni.gov.uk/articles/consent-examination-treatment-or-care>

It should be noted that this guidance contains some recommendations for off-label use of medicines. Trusts and practitioners must be aware of their responsibilities and ensure that appropriate policies are in place when medicines are used off-label.

This guidance makes reference to NICE Cancer Service guidance published prior to the Department's links with NICE and therefore not endorsed by the DoH.
