# Role of Community Planning within the Integrated Care System

**Colette Rogers**

**Head of Health Improvement (South)**

# Factors impacting on Healthy Life Expectancy in Northern Ireland

Produced by PHA Health Intelligence Unit

Data: Smoking during pregnancy, low birthweight, breastfeeding – all 2020; P1 overweight or obese 2018/19-2020/21; HLE 2018-20; achieving 5 GCSEs A\*-C inc Eng & Maths 2019/20; NEETS Oct-Dec 2021; alcohol 2019/20; Economic inactivity May 2022; Emergency admissions per 100k 2020/21; Loneliness 2019/20

# SHARED PURPOSE

## Community Planning

Community Planning aims to improve the connection between all the tiers of Government and wider society work through **partnership** working to jointly **deliver better outcomes** for everyone. Community plans identify long-term priorities for **improving the social, economic and environmental well-being** of districts and the people who live there.

## Public Health Agency

To protect and **improve the health and social wellbeing** of our population / **reduce health inequalities** through strong partnerships

## Integrated Care System NI

To **improve health and wellbeing** of the people of Northern Ireland and **enable the population** to live long, healthy, active lives

# SHARED CHALLENGE: Social Determinants of Health

# 70%

health is primarily shaped by factors outside the direct influence of health care

# 30%

Within the influence of the Health & Social Care System – Includes treatment and prevention

## What makes us healthy?

Good health matters, to individuals and to society. But we don't all have the same opportunities to live healthy lives.

To understand why, we need to look at the bigger picture:

The healthy life expectancy gap between the most and least deprived areas in England is over **18** YEARS

# KEY OPPORTUNITIES...

- Community Planning Partnerships have full geographic coverage across the 11 Council areas in NI with well established partnerships in place with representation across all the groups and organisations who can affect the wider determinants of health
- Connections between CPs and AIPBs will be crucial to affect the 100% and address health inequalities in Northern Ireland
- Need to avoid duplication – plenty of work needs done
- Can we use common outcome indicators to build a complete and fuller picture of the impact of our work – to measure success ( Making Life Better Framework & Indicators)
- Already have examples of successful shared outcomes in health behaviours, lifestyle choices and access to services
